

## SPORT EQUIPMENT

### SKI SKATES

**DRYTEX COMFORT** Drytex Comfort is a high quality, soft texture technical fabric. This technology ensures high breathable features so Drytex Comfort is a special fabric that removes moisture and keeps your body fresh.

**ANTI-BACTERIAL** The applied material has antibacterial properties.

**WATERPROOF** A coating that protects the ski skates upper from getting wet.

**SEMI-SOFT** The shoe upper is made of soft synthetic material connected with hard PP shell parts. This combination gives a sense of comfort when skating and allows ventilation.

**SYNTHETIC MATERIAL** Ice skate boots made entirely or predominantly of synthetic material (PVC, PU, rubber, plastic, artificial leather) are easy to maintain and resistant to moisture.

**STAINLESS STEEL** A type of stainless steel of which the ice skate runners are made ensures durability and resistance to moisture.

**ADJUSTABLE SIZE** Adjustable size of the ice skates ensures their individual adjustment.

**ADJUSTABLE LENGTH** Adjustable skid length allows individual adjustment.

### SKATES

**SEMI-SOFT SHELL** The shoe upper is made of soft synthetic material connected with hard PP shell parts. This combination gives a sense of comfort when skating and allows ventilation.

**HARD SHELL** Hard boot made of durable plastic material, it helps to keep control while riding.

**WHEELS SIZE** The wheel size determines the possibility to increase speed while riding. The larger the wheels, the faster the speed at the expense of manoeuvrability and stability.

**BEARINGS: ABEC** ABEC is a system of bearings classification. The speed and the advancement of the sates increase along with a higher parameter (5, 7, 9).

**ADJUSTABLE SIZE** Adjustable size of the skates ensures their individual adjustment.

**VENTILATION** Ventilation of the shoe increases comfort during use. It provides air and moisture circulation, owing to which the foot can breathe freely.

**SPARE SHOELACES** Additional pair of shoelaces.

**LEDs** Additional LED lamps increase visibility and safety. LEDs are resistant to shock and impacts. They are characterised by durability and longer working time.

**REFLECTIVE ELEMENTS** Reflective elements increase safety during active leisure.

### SCOOTER

**LEAD ACID BATTERY** The battery which uses sponge lead and lead peroxide for the conversion of the chemical energy into electrical power.

**MAX SPEED** Maximum speed of a scooter.

**DRIVING RANGE** Total distance.

**INFLATABLE WHEELS** Wheel inflated with air.

**WHEELS SIZE** The wheel size determines the possibility to increase speed while riding. The larger the wheels, the faster the speed at the expense of manoeuvrability and stability.

**BEARINGS: ABEC** ABEC is a system of bearings classification. The speed and the advancement of the sates increase along with a higher parameter (5, 7, 9).

**BEARINGS: 6000 Z** Made with perfect accuracy, hi-speed ball bearing which provides less friction.

**ADJUSTABLE HEIGHT** The possibility of steering height adjustment.

**FOLDING SYSTEM** The possibility of folding the scooter makes it easier to transport.

### SKATEBOARD

**WHEELS SIZE** The wheel size determines the possibility to increase speed while riding. The larger the wheels, the faster the speed at the expense of manoeuvrability and stability.

**BEARINGS: ABEC** ABEC is a system of bearings classification. The speed and the advancement of the sates increase along with a higher parameter (5, 7, 9).

**BEARINGS: 608 Z** 608z bearings ensure security and stability of riding.

**CANADIAN MAPLE** Deck (board top) made of Canadian maple is durable and lightweight.

**LEDs** Additional LED lamps increase visibility and safety. LEDs are resistant to shock and impacts. They are characterised by durability and longer working time.

### BALANCE BIKE

**INFLATABLE WHEELS** Wheel inflated with air.

**WHEELS SIZE** The wheel size determines the possibility to increase speed while riding. The larger the wheels, the faster the speed at the expense of manoeuvrability and stability.

**BEARINGS: ABEC** High quality, steel ball bearing provides speed and less friction

**ADJUSTABLE HEIGHT** The possibility of steering and saddle height adjustment.

## SKATE ACCESSORIES

### HELMETS

**OUT-MOULD** The outer and inner shell is not inseparably bonded. The outer material (hard shell) effectively absorbs the energy and the impact force is further minimized by the foam.

**HARD SHELL** Out-mold technology, using ABS material as the outer layer of the helmet. ABS guarantees resistance and reliability of the helmet.

**ADJUSTABLE SYSTEM** System allowing for individual adjustment of the helmet size with the use of a knob.

**VENTILATION HOLES** The ventilation holes in the helmet guarantee free air flow. The more holes there are, the faster the removal of moisture outside the helmet, and thus higher comfort while driving.

**REMOVABLE PADS** Removable pads in the helmet allow for keeping them clean.

### OTHERS

**SHOCK ABSORBING PADS** Shock-absorbing pads applied at the points of the largest loads and pressure, thereby protecting the wrists against injuries.

**WHEELS SIZE** The wheel size determines the possibility to increase speed while riding. The larger the wheels, the faster the speed at the expense of manoeuvrability and stability.

**BEARINGS: ABEC** ABEC is a system of bearings classification. The speed and the advancement of the sates increase along with a higher parameter (5, 7, 9).

**4- PACK** Set of four pieces.

## BIKE ACCESSORIES

### HELMETS

**OUT-MOULD** The outer and inner shell is not inseparably bonded. The outer material (hard shell) effectively absorbs the energy and the impact force is further minimized by the foam.

**ADJUSTABLE SYSTEM** System allowing for individual adjustment of the helmet size with the use of a knob.

**VENTILATION HOLES** The ventilation holes in the helmet guarantee free air flow. The more holes there are, the faster the removal of moisture outside the helmet and thus higher comfort while driving.

**REMOVABLE PADS** Removable pads in the helmet allow for keeping them clean.

### GLOVES

**SHOCK ABSORBING PADS** Shock-absorbing pads applied at the points of the largest loads and pressure, thereby protecting the wrists against injuries.

**PULL ON SYSTEM** PULL ON SYSTEM for easier putting on gloves.

**PULL OFF SYSTEM** PULL OFF SYSTEM for easy gloves removal.

## APPAREL ACCESSORIES

**DRYTEX COMFORT** Drytex Comfort is a high quality, soft texture technical fabric. This technology ensures high breathable features so Drytex Comfort is a special fabric that removes moisture and keeps your body fresh.

**ANTI-BACTERIAL** The applied material has antibacterial properties.
