

HI-TEC[®]

2023 CATALOG
SPRING/SUMMER

OUTDOOR APPAREL

WATERPROOF Water resistance is a feature that specifies the resistance of a given laminate to water. Water resistance parameters are given in millimetres water column, which specifies the maximum amount of water against which the laminate is able to protect us. The higher the water resistance value, the more resistant is the material to leaking.

BREATHABILITY Breathability is given in grams of water vapour which the laminate is able to discharge to the 1 m² surface within 24h. The higher this value, the better the breathability of the laminate.

2-LAYER LAMINATION The membrane is laminated with outer layer, and from the inner side it is connected to separate lining.

2.5-LAYER LAMINATION The membrane is connected with outer layer and from the inner side there is additional print applied to the lamination.

3-LAYER LAMINATION The membrane, inner and outer side are laminated together.

DWR COATING DWR (DURABLE WATER REPELLENT) - top treatment applied to fabrics to ensure high water resistance. Thanks to the additional hydrophobic coating water droplets are suspended and roll off the outer layer of the fabric.

3 IN 1 JACKET The 3-in-1 jacket is a jacket with a detachable fleece or softshell, allows the use of it in three different ways.

2 IN 1 PANTS Possibility to attach the legs ensures adaptability to weather conditions.

FEATHERS/DOWN Feather, down or mix filling provides lightness and excellent thermal insulation properties of clothing.

TAPED SEAMS Taped seams provide higher water resistance parameters.

WATERPROOF ZIPPER Zippers covered with additional laminate provide better protection of the clothing against soaking.

TWO-WAY ZIPPER The zipper allows zip up clothes in two directions.

4 WAY STRETCH Stretchy material which significantly increases your comfort and does not constrain your movements due to its 4-direction elasticity.

RIP STOP Fabric reinforced with additional strong fibre ensures the resistance of the fabric to chafing and tear.

VENTILATION Ventilation openings in the clothing are responsible for proper air circulation and evaporation of moisture on the outside.

LEGS ZIPPED Zippers in trouser legs make it easier to put on and take off your shoes.

POWDER SKIRT Powder skirt prevents snow from getting under the outer layer of the clothing and retains the heat inside the jacket.

LEGS POWDER SKIRT Internal powder skirts in the legs protect against the ingress of snow under the pants and into the shoes, thus protecting against heat loss.

REMOVABLE HOOD Possibility to remove the hood.

REMOVABLE BRACES Possibility to remove the braces.

SKIPASS POCKET Comfortable pocket located in the sleeve of the jacket allows for quick and efficient use of the skipass.

DRY POCKET The practical pocket inside the jacket protects the items by getting wet.

THUMB HOLES Internal, elastic cuffs with thumb holes protect hands against cold and keep heat inside the jacket.

REFLECTIVE ELEMENTS Reflective elements increase safety during active leisure.

QUICKDRY Synthetic materials are characterised by a short drying time, which ensures comfort during and after exercise.

MICROFLEECE LINED Microfleece lining increases the thermal comfort of the clothing.

PACKED INTO A COVER Jacket packed into a cover becomes compact and easier to transport.

RECYCLED Recycled material used.

BAMBOO PADDING Padding use bamboo fibers

THERMOACTIVE UNDERWEAR

AIRWAY Used synthetic materials ensure free air flow, which provides the user with a feeling of comfort while practicing various physical activities.

QUICKDRY Synthetic materials are characterised by a short drying time, which ensures comfort during and after exercise.

SEAMLESS Seamless clothing provides a very good moisture transport, while ensuring dryness and maintaining thermal comfort regardless of the level of activity.

COOL DRY Advanced polyester fibers quickly wick moisture away. They provide thermal comfort, do not irritate the skin and are anti-allergic.

ACTIVE APPAREL

AIRWAY Used synthetic materials ensure free air flow, which provides the user with a feeling of comfort while practicing various physical activities.

QUICKDRY Synthetic materials are characterised by a short drying time, which ensures comfort during and after exercise.

SEAMLESS Seamless clothing provides a very good moisture transport, while ensuring dryness and maintaining thermal comfort regardless of the level of activity.

REFLECTIVE ELEMENTS Reflective elements increase safety during active leisure.

BUILT-IN-BRA The built-in bra increases comfort during physical exertion.

MOLDED CUPS Moulded cups sewn permanently into womenswear ensure the comfort of use. They do not move and ensure good moisture discharging.

REMOVABLE MOLDED CUPS Removable moulded cups in the womenswear improve comfort and allow for adjusting it to the different needs of the female users.

ADJUSTABLE STRAPS Adjustable bra straps allow for individual matching, ensuring perfect support of the bust.

AUDIO POCKET Comfortable pocket for an mp3 player, phone, documents, and other small items.

BACK POCKET Applied in the clothing is used for hiding the necessary items.

INNER POCKET Leggings built-in waist pocket, useful and comfortable during training.

BUILT-IN BRIEFS Built-in linen pants increase the comfort of use during training. They provide excellent moisture discharge, dry quickly, do not cause allergies, and are resistance to bacteria and fungi.

MICROFLEECE LINED Microfleece lining increases the thermal comfort of the clothing.

WINDPROOF The material that ensures windproofness.

THINSULATE The application of Thinsulate microfibre ensures better thermal comfort than the conventional synthetic fibres. As a result, the clothing breathes and dries quickly while maintaining lightness.

MICROFLEECE LINED Microfleece lining increases the thermal comfort of the clothing.

WRIST ELASTIC STRAPS Comfortable, flexible wristbands are a practical solution when practicing winter sports.

REFLECTIVE ELEMENTS Reflective elements increase safety during active leisure.

SEAMLESS No seams or their minimization in the clothing provides comfort and convenience of use and eliminates the possibility of abrasions during physical activity.

COOL DRY Advanced polyester fibers quickly wick moisture away. They provide thermal comfort, do not irritate the skin and are anti-allergic.

ANTI-BACTERIAL The applied material has antibacterial properties.

3-PACK Set of three pieces.

MERINO WOOL Merino wool provides thermal comfort during exercise. It is lightweight, quick-dry, and keeps fresh longer. Provides comfort owing to the delicate and fine thread structure.

ELASTIC Flexibility provide comfort and fit.

SHOES

WARM BOOTS Shoes insulated from the inside.

WATERPROOF MEMBRANE Waterproof, windproof, and breathable membrane sock inside the shoe provides optimum performance and comfort. The membrane allows free circulation of water vapour, reducing its condensation inside the shoe and ensures protection of the shoe against rain and snow, thereby maintaining the thermal comfort of feet during exercise.

ACTIVGUARD An innovative membrane as an additional stretchable and durable layer inside the shoe guarantees waterproofness and keep dry feet even in the most extreme conditions (even to 4hours of constant, static immersing in the water). Provides high level of air circulation what guarantees appropriate microclimate for feet during many hours of exercising.

LEATHER Shoes made of leather are breathable and soft, and adapt to the shape of the foot. Owing to these properties, they are more comfortable and breathable.

ACTION LEATHER Type of leather, characterized by high air permeability and high resistance to scratches and scrapes. Action leather is covered with polyurethane finish, thanks to which shoes adapt to your feet, protect against water and do not stretch excessively.

SYNTHETIC MATERIAL Shoes made of a synthetic material (PVC, PU, TPU, rubber) are easy to maintain, offer a large range of colours and designs.

SOFTSHELL Synthetic material of a softshell type is resistant to moisture, provides good ventilation, and resistance to damage. Shoes made of this material are lightweight, breathable, and with proper impregnation it also protects against rain.

KNITTING Shoes made of knitted textile perfectly fitting to your feet. They are lightweight and breathable.

TEXTILE This fabric is based on a network of natural and artificial fibers - footwear utilising it proves to be lighter and more breathable.

MESH Synthetic mesh provides excellent breathability of the footwear. Owing to this, the footwear is lighter and quickly discharges moisture to the outside of the upper.

VIBRAM Vibram soles are characterised by high adhesion, durability and resistance to abrasion and cracking. The system of grooves facilitates cleaning and resistance to low temperatures makes the Vibram soles appreciated by many manufacturers of athletic footwear.

RB RUBBER Sole made of RB rubber is slip resistant, flexible, and waterproof. It perfectly insulates the foot from the ground, which significantly increases thermal comfort on cold days.

TPR RUBBER Thermoplastic rubber is characterised by high strength and resistance to low temperatures. The sole made of this material is durable and wear resistant.

EVA PHYLON Thanks to innovative manufacturing technology, EVA Phylon foam is extremely light, flexible and has excellent cushioning properties.

APPAREL ACCESSORIES

AIRWAY Used synthetic materials ensure free air flow, which provides the user with a feeling of comfort while practicing various physical activities.

QUICKDRY Synthetic materials are characterised by a short drying time, which ensures comfort during and after exercise.

WATERPROOF The plastic layer (PE or TPU) between the shell and insulation ensures waterproofness.

EVA FOAM EVA foam adapts perfectly to the foot. It is lightweight and flexible, thereby providing excellent cushioning while maintaining a small weight.

HI-POLY Breathable, lightweight and antibacterial foam. Perfect shock-resistance and comfort.

REMOVABLE INSOLE The possibility of removing the insole.
WATER DRAINAGE SYSTEM This technology allows water to quickly drain out of your shoes.

REFLECTIVE ELEMENTS Reflective elements increase safety during active leisure.

IMPREGNATION/ CLEANING/ CARE AGENT

CLEANING AGENT Active substances contained in the line of cleaning agents intensively clean and protect dirty surfaces. They renew the original properties of cleaned surfaces and prepare them for impregnation.

CARE AGENT The line of care agent nourishes, restores color and refreshes the structure of the material.

IMPREGNATION AGENT The impregnation agent form a layer resistant to water and dirt, without blocking the air permeability of materials.

DEODORANT Refreshes and prevents the formation of unpleasant odors inside the footwear.

CLOTHING EQUIPMENT / ACCESSORIES SHOES Assortment group dedicated to cleaning, conditioning and impregnating agents.

WASHING MACHINE Cleaning and impregnating agents intended for washing in a washing machine.

OUTDOOR EQUIPMENT

SLEEPING BAG

SLEEPING BAG SIZE Size of sleeping bags divided into Mummy-Shape Sleeping Bags and Envelope-Shape Sleeping Bags.

PACKED SIZE Size when packed.

KG Total weight of the product.

TEMPERATURE The temperature range which takes into account the minimum, comfortable, and maximum temperature for a given sleeping bag.

DOUBLE INSULATED Double lining combined with partial stitching significantly improves the thermal parameters of the sleeping bag.

SLEEPING PAD

DIMENSION The dimensions take

into account the length, width and thickness of the mat / mats.

PACKED SIZE Size when packed.

KG Total weight of the product.

TENT

SINGLE-WALL Tent with single-wall.

DOUBLE-WALL Tent with a double wall: breathable and waterproof.

WATERPROOF RAIN FLY Water resistance is a feature that specifies the resistance of a given laminate to water. Water resistance parameters are given in millimetres water column, which specifies the maximum amount of water against which the laminate is able to protect us. The higher the water resistance value, the more resistant is the rain fly to leaking.

TAPED SEAMS Taped seams provide higher water resistance parameters.

WATERPROOF FLOOR The floor made of PE plastic is characterized by high water resistance. Water resistance parameters are given in millimetres water column, which specifies the maximum amount of water against which the laminate is able to protect us.

UV PROOF The material is resistant to UV radiation.

CAPACITY Number of persons that the tent chamber can accommodate.

SOLARPROOF The flysheet is covered with a metallic layer that limits overheating of the tent.

PACKED SIZE Size when packed.

WEIGHT Total weight of the product.

POLES

ULTRA LIGHT Carbon fibers from which the trekking poles are made ensure lightness and high stiffness of the poles.

3 SECTIONS Three-section poles are a compromise between stability and durability. They are versatile and easy to transport.

INLOCK SYSTEM Internal locking system in Nordic Walking and Trekking poles, operating according to the right-hand rule. Additional advantages are durability and anti-shock system.

OUTLOCK SYSTEM External locking system in Nordic Walking and Trekking poles, acting as a quick connector. It does get stuck, is easy to use with gloves, and less strength is needed to fasten it.

OUTCHECK LOCK External locking system in Nordic Walking and Trekking poles, acting as a quick connector. It does get stuck, is easy to use with gloves, and less strength is needed to fasten it.

ANTI-SHOCK SYSTEM Anti-shock system of the pole reduces the force with which a hand influences the pole, thereby increasing the comfort of use, while saving your wrists and arms.

DURABLE RUBBER TIPS Replaceable rubber tips enable the adjustment of the poles to a given activity, and additionally dampen vibrations when the pole hits the ground.

WIDIA Heads made of sintered carbide (widia) are very durable and work well even on hard rocks.

ADJUSTABLE STRAPS Adjustable straps of the poles partially support the body weight, effectively relieving the wrists and forearms.

OUTDOOR ACCESSORIES

GAITERS

WATER AND DUST RESISTANT Resistance to water, dust, and other contaminations.

RIP STOP Fabric reinforced with additional strong fibre ensures the resistance of the fabric to chafing and tear.

SPORT ACCESSORIES

THERMOS/WATER BOOTLE ETC.

VACUUM INSULATION Vacuum insulation applied in Thermoses or thermal cups ensures long lasting heat of the liquid, using low thermal conductivity of the vacuum between the vessel walls.

STAINLESS STEEL Stainless steel of which the inner walls of the thermos or thermal cup are made is resistant to high temperatures and corrosion.

QUICK STOPPER The quick opening and closing system is practical in any conditions.

ANTI-LEAK Locking system that prevents fluid leakage.

BPA FREE Product doesn't contain Bisphenol-A.

LIGHTING

LUMENS The amount of light produced by the flashlight.

WHITE LEDS LED lamp emitting white light. LEDs are resistant to shock and impacts. They are characterised by durability and longer working time.

RED LEDS LED lamp emitting red light. LEDs are resistant to shock and impacts. They are characterised by durability and longer working time.

3 LIGHT FUNCTION Three lighting modes.

WATERPROOF IPX3 IPX3 offers protection from a splash of water under pressure of 80-100kN/m2 at a rate of 10L/min at an angle of up to 60 degrees for at least 5 minutes and protects from entering the casing objects above 1mm.

BATTERY INCLUDED Set includes batteries.

TOWEL / PICNIC BLANKET

TWO-SIDED Owing to the two-sided material, the towel becomes more durable, thicker and more versatile.

SUNGLASSES

UV400 UV400 filter ensures 100% protection against UVA and UVB solar radiation.

UV FILTER The filter category determines the degree of light permeability. The higher the category, the lower the light permeability. Category 3 means 8-18% light permeability. Cat. 2: 18-43%, cat. 1: 43-80%, cat. 0: 80-100%.

POLARIZATION The polarizing coating eliminates reflections, improves contrast, ensures clarity of vision and protects eyes from radiation.

POLY CARBONATE The polycarbonate from which the lenses are made is a durable, unbreakable material, resistant to scratches and UV radiation.

REVO The REVO coating perfectly reflects ultraviolet radiation, eliminates reflections, improves contrast and gives the lenses a characteristic rainbow color.

TR90 FRAME Grilamid TR90 of which the frames are made ensures lightness, elasticity and strength of the glasses.

BIKE ACCESSORIES

HELMETS

IN-MOULD The technology based on injection moulding of the helmet. Prevents the inner and outer layer of the helmet from disintegrating, thereby ensuring durability and solid workmanship.

ADJUSTMENT SYSTEM System allowing for individual adjustment of the helmet size with the use of a knob.

REMOVABLE VISOR Removable visor allows for the adjustment of the helmet to the individual needs of the user.

VENTILATION HOLES The ventilation holes in the helmet guarantee free air flow. The more holes there are, the faster the removal of moisture outside the helmet and thus higher comfort while driving.

ANTI-INSECT MESH The mesh in the ventilation holes of the helmet protects against insects.

REMOVABLE PADS Removable pads in the helmet allow for keeping them clean.

GLOVES

SHOCK-ABSORBING PADS Shock-absorbing pads of the cycling gloves applied at the points of the largest loads and pressure, are intended to mitigate the shocks while riding, thereby protecting the wrists against injuries.

PULL ON SYSTEM PULL ON SYSTEM for easier putting on gloves.

PULL OFF SYSTEM PULL OFF SYSTEM for easy gloves removal.

REFLECTIVE ELEMENTS Reflective elements increase safety during active leisure.

BAGGAGE

BACKPACK/ BAG ETC.

ERGONOMIC BACK Soft filling of the back panels ensures comfort and precise fit of the backpack, even under heavy load.

CARRYING SYSTEM Carrying system allowing for individual adjustment of braces, the hip and the chest belts.

ADJ SYSTEM Back length adjustable to the backpack user's height.

AIR COOLED SYSTEM Air Cooled system applied in the back part of the backpack provides high air circulation, ensuring perfect control of heat and moisture, leaving your back dry during active outdoor recreation.

AIRDUCT SYSTEM Back ventilation through a central air channel and mesh made of quick-drying material.

RAIN BAG COVER The rain cover hidden in the pocket on the bottom of the backpack effectively protects its contents from rain.

SHOE COMPARTMENT Compartment for shoes.

ORGANIZER Built-in pocket with multiple compartments is a perfect organizer for pens, notepad, and other small items.

LAPTOP POCKET Built-in laptop pocket or compartment.

H2O SYSTEM Opening in the backpack for a tube enabling the use of a waterskin.

AUDIO SYSTEM Opening in the backpack or in the bag for a headphone cable, allowing the use of an mp3 player or other audio equipment.

GLASSES POCKET A special pocket for glasses, usually filled with a soft padding, protecting the glasses against scratching.

WHISTLE Built-in whistle increases safety during trips.

VENTILATION Ventilation in the form of openings or mesh ensures good air flow and maintaining freshness.

REFLECTIVE ELEMENTS Reflective elements increase safety during active leisure.

RIP STOP The fabric reinforced with additional fiber ensures material resistance to abrasion and tearing.

SUITCASE

ABS HARD SHELL Suitcase made in hard shell technology, using durable ABS.

COMBINATION LOCK A code used in suitcases ensures protection of personal luggage against theft.

CABIN BAGGAGE A so-called cabin suitcase, that is a suitcase with the dimensions of hand luggage. Note: the dimensions of hand luggage vary depending on the airline.

360° WHEELS A system of wheels that allows you to rotate your suitcase around its axis.
